DETAILED ACTION

This Office action is in response to applicants' amendment filed on 08/04/2004.

Claims 1-21 are pending in the Action.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. The claimed invention is directed to a network emulator for providing an emulated network. The claimed network emulator includes a plurality of network node executable images, wherein each of said network node executable images includes executable code that is operable to execute without modification on a physical networking device corresponding to one of said plurality of emulated networking devices, and wherein said executable code within each of said network node executable images that is operable to execute without modification on a corresponding physical networking device includes a program component operable to perform signaling and routing.
2. Because the closest prior art of record does not expressly disclose or suggest the claimed feature limitations, claims 1-21 are thus deemed allowable over the prior art of record.

Conclusion

1. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2128
